

CURVE

The Curve vertical radiator and towel radiator represents a revolution, a quantum leap in radiant heating technology.

Our Curve range combines an ultra-fine, sinuous rounded shape with the lightness of a subtle heating body. It reinvents the concept of radiant heat with style and originality. The characteristics of the curve give a feeling of movement and lightness, available in a vertical and horizontal version with four different outputs.

CURVE

A line made of CURVES reminiscent of the classic shapes of heating units, but revisited and redesigned in a modern way. A clean design to which MAARMO’s characteristic material gives an effect of lightness which is suitable for every room in your home.

Also available in horizontal version.

Technical data and dimensions

The radiating elements of this series, are available in the following versions

Electric

EMC

EN55014-1; EN55014-2;
EN61000-3-2;
EN61000-3-3

Low voltage

EN60335-1;
EN60335-2-30 ; EN62233

RoHS

EN50581

40 x 160 x 6,5 cm

*Also available
in the horizontal
version*

60 x 110 x 6,5 cm

*Also available
in the horizontal
version*
